

Moyne Health Services

Kitchen Fire Prevention Project

Expression of interest from interested builders

Moyne Health Services is seeking an experienced construction company to install a 1hr fire rating around the current kitchen. The existing dry stores and salad prep area will be relocated into the now empty old dining area that will form part of the kitchen and fire compartment. There will be a new flat roof that will cover the complete area to facilitate the 1hr 60/60/60 fire rated wall being continued to the underside of new roof.
